

ORIGINAL!

CHILL
and **CHILL-V**

AIR LINE ANTI-FREEZE AND CONDITIONER

Original **CHILL** and **CHILL-V** are proven, highly successful air line anti-freeze products from Lacey-Harmer

Original CHILL

Original CHILL is formulated with a proprietary blend of ingredients to protect and condition intermediate systems, such as Tanner Tanks[®].

CHILL-V

CHILL-V is specifically formulated to condition and operate in electric vaporizer systems such as Frosto[®].

Flexible

Both **CHILL** and **CHILL-V** use a methonal based alcohol as the primary carrier and moisture absorber. A special blend of products compounded to protect rubber and synthetic parts in your system and resist corrosion and rust.

Both of these products were developed to closely match the original equipment manufacturer's specifications, while offering bottom-line savings

Cost Effective

Air System Conditioner

For your battle against air line freeze-ups, these products are your best time proven, cost effective solutions.

Successfully used for two decades throughout North America.
